Summary

Cybersecurity professional with practical experience in **Penetration Testing** and **VAPT**. Certified in **Security+**, **eJPT**, and **eCTHP**, with advanced training in **Two Cybersecurity Bootcamps** from the **NCA** and **Tuwaiq Academy**. Currently pursuing the **OSED** certification and expanding expertise in the OT field through hands-on experience in **OT Cybersecurity** projects.

Experience

- Cybersecurity Engineer, Digital Era** May 2026 – Present
- Built and prepared **OT cybersecurity panels** from scratch for **Factory Acceptance Testing (FAT)**, handling physical cabling, device installation, configuration, integration, and end-to-end connectivity validation.
 - Configured and integrated **FortiGate firewalls, Nozomi, IDS, RedBox, Fortinet switches, and Windows Servers**, ensuring seamless communication across the OT environment.
 - Implemented **HA and redundant architectures** across firewalls, switches, and servers, including primary/secondary configurations and Windows Server **Group Policy** management across **critical** and **non-critical zones**.
 - **Led** FAT preparation and execution for **Saudi Energy National Grid** projects, validating functionality and requirements.
- COOP Information Security Intern, Saudi Credit Bureau - SIMAH** Aug 2024 – Mar 2025
- Performed **Penetration Testing**, depending on the severity, including:
 - Prepared proof-of-concept (PoC), generated reports, and conducted verification reports.
 - Conducted **Vulnerability Assessments** on multiple internal and external assets using **Qualys**, including:
 - Managing scans, scheduling, performing network discovery and mapping, and reports generation.
 - Worked with Governance, Risk, and Compliance (**GRC**), including:
 - Reviewed policies, procedures, and guidelines to align with the **SAMA CSF** in Information Security Assurance.

Technical Training & Bootcamps

- Vulnerability Analysis & Exploitation** Aug 2025 – Jan 2026
- Completed an advanced bootcamp in **vulnerability analysis, reverse engineering, and exploit development**, utilizing tools such as **IDA** and **WinDbg** and other debugging frameworks.
 - Currently preparing for the Offensive Security Exploit Developer (**OSED**) certification independently.
 - Independently designed and implemented a C-based security automation project integrating **Nmap** and **Nikto** to dynamically identify **OWASP Top 10** vulnerabilities and streamline vulnerability assessment reporting.
- NCA Cybersecurity Trainee** Jul 2024 – Jul 2024
- Completed intensive training in two of CompTIA's courses, **Security+** and **Network+**.
 - Engaged in Capture the Flag (**CTF**) exercises to enhance practical skills in multiple cybersecurity fields

Education

Bachelor's degree in Cyber Security Aug 2020 – Dec 2024 | Riyadh, Saudi Arabia
Princess Nourah bint Abdulrahman University - GPA:4.37

Certificates

- Offensive Security Exploit Developer (OSED)**
OffSec - In Progress
- Security+** CompTIA - Apr 2026
- Certified Threat Hunting Professional (eCTHP)** iNE eLearnSecurity - Feb 2025
- SCE Membership Cybersecurity** Saudi Council of Engineers - May 2026
- Junior Penetration Tester (eJPTv2)** iNE eLearnSecurity - Nov 2023
- Qualys Certified Specialist VMDR** Qualys - Oct 2024

Other

- Technical Skills**
 - Burp Suite • WinDbg • Qualys
 - Metasploit • IDA • Splunk
- Cisco Courses**
 - Ethical Hacker 🔗
 - Cybersecurity Essentials 🔗
- Languages**
 - Arabic / Native
 - English / Professional
